Energizing Water: Flowform Technology and the Power of Nature Jochen Schwuchow, John Wilkes, Iain Trousdell

The poor quality of water and its limited supply and availability is one of the greatest challenges for our future. Presently, forty percent of the world's population is unable to find adequate fresh water.

More than forty years of research has been carried out on the positive effects of rhythms and specific flow on the capacity of water to support life. *Energizing Water* presents the results of that cutting-edge research to the general and professional reader at a time when interest in finding solutions to water's huge worldwide problems is growing rapidly.

Three aspects determine water quality:

- its chemical constituents (including oxygen levels)
- its organic aspects (with the danger of contamination by effluent, pathogens, and algae)
- its “energetic” nature

Water's “energetic” nature has been recognized from time immemorial by traditional cultures, which developed their own approaches to water quality, referring to such energy as *prana* and *qi*. Now, through the introduction of quantum physics into the life sciences, modern science is also beginning to recognize this concept, measuring energy as light emission.

Research into energetic water quality?and particularly into the creation of molded surfaces that support biological purification of the chemical and organic elements, as well as enlivening the energetic attributes?goes back to the pioneering work of George Adams and John Wilkes during the 1960s. The invention of “flowform” technology in 1970 carried this research further, providing the world with one of the first modern biomimicry eco-technologies. This creative technology applies nature's best methods to produce extraordinary results. This book outlines the background story of the research and application of the flowform method today.

From reader reviews:

Fredrick Alfred:

This book untitled Energizing Water: Flowform Technology and the Power of Nature to be one of several books that best seller in this year, honestly, that is because when you read this publication you can get a lot of benefit upon it. You will easily to buy this particular book in the book retailer or you can order it through online. The publisher of the book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Cell phone. So there is no reason to you to past this reserve from your list.

Rebecca Stark:

Playing with family inside a park, coming to see the coastal world or hanging out with close friends is thing that usually you will have done when you have spare time, and then why you don't try factor that really opposite from that. 1 activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Energizing Water: Flowform Technology and the Power of Nature, you are able to enjoy both. It is good combination right, you still desire to miss it? What kind of hang-out type is it? Oh seriously its mind hangout folks. What? Still don't understand it, oh come on its called reading friends.

Cathryn Walker:

Are you kind of stressful person, only have 10 or even 15 minute in your time to upgrading your mind ability or thinking skill even analytical thinking? Then you are having problem with the book compared to can satisfy your short period of time to read it because this time you only find e-book that need more time to be go through. Energizing Water: Flowform Technology and the Power of Nature can be your answer mainly because it can be read by a person who have those short time problems.

Luann Bowen:

As a student exactly feel bored to reading. If their teacher expected them to go to the library or even make summary for some reserve, they are complained. Just very little students that has reading's heart or real their pastime. They just do what the trainer want, like asked to the library. They go to there but nothing reading seriously. Any students feel that studying is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Energizing Water: Flowform Technology and the Power of Nature can make you experience more interested to read.
