Case Competencies in Orthopaedic Surgery Rachel M Frank, Brian Forsythe, Matthew T Provencher

Case Competencies in Orthopaedic Surgery is a centralized, easy-access guide to preparing for cases most commonly encountered during training. Written by expert author teams consisting of both **attending surgeons** and **residents**, it follows a **technique-based format and design** that summarizes the surgical steps, **from room set-up to closure**, of all cases relevant to the **15 categories** of "Orthopaedic Surgery Case Minimums" as determined by the **ACGME**.

- Forty "**technique-based chapters**" boast an outline format with minimal text, high-definition **intraoperative figures**, and original **illustrations**.
- Each chapter contains easy-to-use tables outlining the **surgical steps, essential equipment, technical pearls, and common pitfalls** of each case.
- Includes coverage of today's **hot topics in orthopaedic surgery**, such as fractures, arthroscopy, arthroplasty, "bread and butter" pediatric cases, and basic subspecialty cases (spine, foot and ankle, oncology, hand, shoulder, and more).
- Lists **CPT and ICD 9/10 codes** to help with case logging.
