Chasing Science at Sea: Racing Hurricanes, Stalking Sharks, and Living Undersea with Ocean Experts Ellen Prager

To the average office-dweller, marine scientists seem to have the good life: cruising at sea for weeks at a time, swimming in warm coastal waters, living in tropical paradises. But ocean scientists who go to sea will tell you that it is no vacation. Creature comforts are few and the obstacles seemingly insurmountable, yet an abundance of wonder and discovery still awaits those who take to the ocean. *Chasing Science at Sea* immerses readers in the world of those who regularly go to sea—aquanuts living underwater, marine biologists seeking unseen life in the deep ocean, and the tall-ship captains at the helm, among others—and tells the fascinating tale of what life—and science—is like at the mercy of Mother Nature.

With passion and wit, well-known marine scientist Ellen Prager shares her stories as well as those of her colleagues, revealing that in the field ingenuity and a good sense of humor are as essential as water, sunblock, and GPS. Serendipity is invaluable, and while collecting data is the goal, sometimes just getting back to shore means success. But despite the physical hardship and emotional duress that come with the work, optimism and adventure prompt a particularly hardy species of scientist to return again and again to the sea.

Filled with firsthand accounts of the challenges and triumphs of dealing with the extreme forces of nature and the unpredictable world of the ocean, *Chasing Science at Sea* is a unique glimpse below the water line at what it is like and why it is important to study, explore, and spend time in one of our planet's most fascinating and foreign environments.

From reader reviews:

Luis Garcia:

As people who live in typically the modest era should be change about what going on or data even knowledge to make these people keep up with the era that is certainly always change and move ahead. Some of you maybe will update themselves by looking at books. It is a good choice to suit your needs but the problems coming to you actually is you don't know what type you should start with. This Chasing Science at Sea: Racing Hurricanes, Stalking Sharks, and Living Undersea with Ocean Experts is our recommendation to help you keep up with the world. Why, because book serves what you want and need in this era.

Robert Frye:

People live in this new moment of lifestyle always try and and must have the time or they will get lots of stress from both day to day life and work. So , when we ask do people have time, we will say absolutely of course. People is human not really a huge robot. Then we request again, what kind of activity have you got when the spare time coming to an individual of course your answer can unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative within spending your spare time, the actual book you have read is actually Chasing Science at Sea: Racing Hurricanes, Stalking Sharks, and Living Undersea with Ocean Experts.

Wanda Woods:

Don't be worry when you are afraid that this book will probably filled the space in your house, you may have it in e-book means, more simple and reachable. That Chasing Science at Sea: Racing Hurricanes, Stalking Sharks, and Living Undersea with Ocean Experts can give you a lot of friends because by you taking a look at this one book you have issue that they don't and make you more like an interesting person. This specific book can be one of a step for you to get success. This publication offer you information that perhaps your friend doesn't recognize, by knowing more than some other make you to be great men and women. So , why hesitate? We should have Chasing Science at Sea: Racing Hurricanes, Stalking Sharks, and Living Undersea with Ocean Experts.

Larry Cain:

As a university student exactly feel bored to be able to reading. If their teacher expected them to go to the library or even make summary for some publication, they are complained. Just tiny students that has reading's soul or real their pastime. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that examining is not important, boring in addition to can't see colorful pictures on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Chasing Science at Sea: Racing Hurricanes, Stalking Sharks, and Living Undersea with Ocean Experts can make you experience more interested to read.
