**Surface Modeling: High Accuracy and High Speed Methods (Applied Ecology and Environmental Management)** Tian-Xiang Yue

Although GIS provides powerful functionality for spatial analysis, data overlay and storage, these spatially oriented systems lack the ability to represent temporal dynamics, which is a major impediment to its use in surface modeling. However, rapid development of computing technology in recent years has made real-time spatial analysis and real-time data visualization become realizable. Based on newly developed methods, **Surface Modeling: High Accuracy and High Speed Methods** explores solutions to big-error and slow-efficiency problems, two critical challenges that have long plagued those working in with geographical information system (GIS) and computer-aided design (CAD).

By developing high accuracy and high speed methods for surface modeling, the book builds a bridge between the mathematical-oriented theory of surface modeling and the user-oriented application where the user is actually able to retrieve information on the method itself. The author examines a novel method of high accuracy surface modeling (HASM) in terms of the fundamental theorem of surfaces. He then analyzes the coefficient matrix and develops an adaptive method of HASM (HASM-AM), a multi-grade method of HASM (HASM-MG), and an adjustment method of HASM (HASM-AD). He uses numerical tests and real world studies to demonstrate that HASM-AM, HASM-MG, and HASM-AD have highly accelerated computational speed, especially for simulations with huge computational work.

Building on this, the book discusses a HASM-based method for dynamic simulation (HASM-FDS), and then applies HASM methods to simulate terrains, climate change, ecosystem change, land cover, and soil properties. It demonstrates HASM's potential for simulating population distribution, human carrying capacity, ecosystem services, ecological diversity, change detection, and wind velocity. The book concludes with a discussion of the problems that exist in surface modeling on a global level and evaluates possible solutions to these problems.

### **From reader reviews:**

#### **Marietta Allred:**

This Surface Modeling: High Accuracy and High Speed Methods (Applied Ecology and Environmental Management) book is simply not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is usually information inside this guide incredible fresh, you will get details which is getting deeper an individual read a lot of information you will get. This kind of Surface Modeling: High Accuracy and High Speed Methods (Applied Ecology and Environmental Management) without we understand teach the one who looking at it become critical in contemplating and analyzing. Don't end up being worry Surface Modeling: High Accuracy and High Speed Methods (Applied Ecology and Environmental Management) can bring any time you are and not make your handbag space or bookshelves' come to be full because you can have it inside your lovely laptop even phone. This Surface Modeling: High Accuracy and High Speed Methods (Applied Ecology and Environmental Management) having very good arrangement in word in addition to layout, so you will not sense uninterested in reading.

#### **Travis Berry:**

Typically the book Surface Modeling: High Accuracy and High Speed Methods (Applied Ecology and Environmental Management) has a lot of knowledge on it. So when you read this book you can get a lot of gain. The book was published by the very famous author. Tom makes some research before write this book. This particular book very easy to read you can find the point easily after reading this book.

#### **Robert Lyman:**

People live in this new time of lifestyle always try to and must have the free time or they will get large amount of stress from both way of life and work. So , if we ask do people have free time, we will say absolutely sure. People is human not really a huge robot. Then we inquire again, what kind of activity are there when the spare time coming to you actually of course your answer will probably unlimited right. Then do you try this one, reading textbooks. It can be your alternative within spending your spare time, often the book you have read is actually Surface Modeling: High Accuracy and High Speed Methods (Applied Ecology and Environmental Management).

#### **Hoa Gilkey:**

Reading a reserve make you to get more knowledge from that. You can take knowledge and information originating from a book. Book is prepared or printed or outlined from each source that filled update of news. In this modern era like currently, many ways to get information are available for you. From media social including newspaper, magazines, science reserve, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just searching for the Surface Modeling: High Accuracy and High Speed Methods (Applied Ecology and Environmental Management) when you essential it?
