Guide to Legionellosis: Risk Assessment R.G. Brown, M.A. Roper

This guide presents a structured framework for legionellosis risk assessment which may be carried out in house by suitably experienced staff or by specialist consultants. The book must be read and acted upon in conjunction with the new HSC "Approved Code of Practice and Guidance: Legionnaires' disease: The control of legionella bacteria in water systems", which details the overall requirements for risk assessment and risk management of water related systems. The guide is also an information resource for risk assessors and the building managers who may employ them.
