**Personal Mobilities (Networked Cities Series)** Aharon Kellerman

*Personal Mobilities* provides a systematic study of personal movement focusing on the dimensions of space, individuals, societies and technologies. Kellerman examines a variety of personal mobilities, including air transportation, through several perspectives, examining the human need for movement, their anchoring within wider societal trends, commonalities and differences among mobility technologies and international differences.

Although spatial mobility seems geographical by its very nature, the topic has been so far treated only partially, and mainly by sociologists. *Personal Mobilities* highlights geographical as well as sociological aspects and is the first book to focus solely on personal mobilities.
