Practical IP and Telecom for Broadcast Engineering and Operations (Focal Press Media Technology **Professional Series**) Fred Huffman

What you need to know to survive, long term.

Interests between broadcasters and telecom people are blurring. Technical operations and design engineers in one field are increasingly required to deal with practices and techniques in the other. The problem is expectations and terminology differences aren't recognized until it's too late.

Take "Quality of Service." The telecom people specify a percentage of the time that the service is guaranteed to be available. The down time may be very, very small. But, if it occurs during a high-priced commercial in the Super Bowl, it is very, very serious for the broadcaster. Practical IP and Telecom for Broadcast Engineering and Operations teaches the technology and how to structure it and make sure the finances work in your favor.

Learn how to:

- * Define communications circuit, equipment, facilities and services used in broadcast engineering and operations.
- * Evaluate suppliers as well as their products and services.
- * Prepare technical specifications and requests for bids, proposals required in competitive procurement actions.
- * Conduct communications operational effectiveness and cost audits.
- * Prepare communications cost management strategies and plans.
- * Plan and execute capital projects.
- * Survive Long-Term

Critical for engineers, technicians, and managers engaged in designing, installing, testing, and maintaining equipment and network services for program content, training material, or audio/video conferencing. Valuable knowledge for planning, design, integration and operation of communications equipment, facilities and services used in broadcast operations, training and conferencing applications.

Fred Huffman is a systems engineer with Athens Olympic Broadcasting, the Host Broadcaster for the 2004 Games. He has more than 35 years experience in technical and management roles in broadcasting and telecommunications fields. This work is largely a reflection of that experience, captured in a way that introduces the reader to technical aspects of IP, ATM and classical telecom, along with business essentials such as contracts, tariffs, project planning, budgeting and long range planning.

From reader reviews:

Quentin Ryan:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to know everything in the world. Each publication has different aim or maybe goal; it means that guide has different type. Some people really feel enjoy to spend their time to read a book. They are really reading whatever they have because their hobby is definitely reading a book. Why not the person who don't like studying a book? Sometime, individual feel need book when they found difficult problem or perhaps exercise. Well, probably you will require this Practical IP and Telecom for Broadcast Engineering and Operations (Focal Press Media Technology Professional Series).

Calvin Baker:

As people who live in the modest era should be change about what going on or information even knowledge to make these individuals keep up with the era that is certainly always change and progress. Some of you maybe may update themselves by looking at books. It is a good choice in your case but the problems coming to an individual is you don't know which one you should start with. This Practical IP and Telecom for Broadcast Engineering and Operations (Focal Press Media Technology Professional Series) is our recommendation to help you keep up with the world. Why, as this book serves what you want and need in this era.

Hoa Gilkey:

Guide is one of source of knowledge. We can add our information from it. Not only for students and also native or citizen want book to know the update information of year to help year. As we know those publications have many advantages. Beside we all add our knowledge, may also bring us to around the world. By the book Practical IP and Telecom for Broadcast Engineering and Operations (Focal Press Media Technology Professional Series) we can have more advantage. Don't someone to be creative people? To get creative person must love to read a book. Only choose the best book that suited with your aim. Don't possibly be doubt to change your life with that book Practical IP and Telecom for Broadcast Engineering and Operations (Focal Press Media Technology Professional Series). You can more attractive than now.

Jerry Bell:

Some individuals said that they feel bored when they reading a e-book. They are directly felt this when they get a half elements of the book. You can choose the particular book Practical IP and Telecom for Broadcast Engineering and Operations (Focal Press Media Technology Professional Series) to make your reading is interesting. Your personal skill of reading proficiency is developing when you such as reading. Try to choose very simple book to make you enjoy to see it and mingle the opinion about book and studying especially. It is to be very first opinion for you to like to available a book and study it. Beside that the guide Practical IP and Telecom for Broadcast Engineering and Operations (Focal Press Media Technology Professional Series)

can to be your friend when you're truly feel alone and confuse in doing what must you're doing of the time.
