Getting from Arithmetic to Algebra: Balanced Assessments for the Transition (0) Judah L. Schwartz, Joan M. Kenney

"Math isn't about getting the answer. It's about sense-making: perceiving patterns, producing reasoned explanations, developing productive habits of mind. This book offers a collection of engaging problems that provide middle school students with opportunities to think mathematically. The problems are grist for mathematical thought--I had fun working them!"

--**Alan Schoenfeld**, University of California, Berkeley

"This is a great teacher resource. The assessments add a level of fun, interest, and challenge to the mathematical curriculum. I recommend them for use with students at all levels of ability and with courses at all levels of rigor."

--**Melanie Nichols**, Dean of Academic Affairs (ret.), Arkansas School for Mathematics, Sciences and the Arts, Hot Springs, Arkansas

"Teachers who know that their students need to think in math class will find this book, from a distinguished design team, an invaluable assessment tool."

Hugh Burkhardt, Shell Centre for Mathematical Education, University of Nottingham, UK

In this innovative book, two experienced educators present a fresh and engaging approach to mathematics learning in the middle grades with the transition from arithmetic to algebra. The authors provide a collection of balanced, multi-dimensional assessment tasks designed to evaluate students ability to work with mathematical objects and perform mathematical actions. Assisting teachers in their efforts to put into practice the NCTM and Common Core State Standards, these assessments were carefully developed and tested to make them as revealing and adaptable as possible, suitable for incorporation into any curriculum. Teachers will appreciate the explicit and illustrative material the authors include to specifically help assess the mathematical understanding of students in grades 5-8. The text features a teachers guide to each task, reproducible student tasks, and solutions and rubrics.

From reader reviews:

Stacey Smith:

Now a day folks who Living in the era just where everything reachable by talk with the internet and the resources in it can be true or not call for people to be aware of each facts they get. How many people to be smart in receiving any information nowadays? Of course the answer is reading a book. Reading through a book can help men and women out of this uncertainty Information mainly this Getting from Arithmetic to Algebra: Balanced Assessments for the Transition (0) book because book offers you rich details and knowledge. Of course the information in this book hundred percent guarantees there is no doubt in it you know.

Michael Counts:

Typically the book Getting from Arithmetic to Algebra: Balanced Assessments for the Transition (0) has a lot associated with on it. So when you make sure to read this book you can get a lot of profit. The book was published by the very famous author. Mcdougal makes some research prior to write this book. This kind of book very easy to read you will get the point easily after reading this book.

James Holmes:

Do you really one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Try to pick one book that you never know the inside because don't evaluate book by its deal with may doesn't work is difficult job because you are scared that the inside maybe not since fantastic as in the outside appearance likes. Maybe you answer is usually Getting from Arithmetic to Algebra: Balanced Assessments for the Transition (0) why because the amazing cover that make you consider in regards to the content will not disappoint you actually. The inside or content is fantastic as the outside as well as cover. Your reading 6th sense will directly direct you to pick up this book.

Bruce Hensley:

As a university student exactly feel bored in order to reading. If their teacher requested them to go to the library or make summary for some reserve, they are complained. Just little students that has reading's soul or real their pastime. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading really. Any students feel that reading is not important, boring as well as can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this age, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Getting from Arithmetic to Algebra: Balanced Assessments for the Transition (0) can make you experience more interested to read.
