Written for discerning marijuana growers looking to get more bang for their buck, this is the only book that shows readers how to get multiple successful harvests from one single plant.

Cannabis Regeneration is an intermediate grow guide that dispenses with the basics and instead dives into the science of marijuana growing. This one-of-a-kind book explains the author's revolutionary grow method, which aims to increase plant production and save both time and money for every home grower.

Growing marijuana, whether for medical or recreational reasons, can take up a lot of your time, as well as your money, energy, and effort — and, at the end of every grow, after harvesting the buds, you simply throw the rest of your plant away. But it doesn't have to be this way; with J. B. Haze's unique regeneration method, you can recycle your harvested cannabis plants and bring them back to life, again and again, in order to harvest more buds! If you follow the steps that are easily outlined in this book, you can harvest every single cannabis plant several times without compromising the quality of your buds.
