Statistical Methods for Survival Data Analysis (Wiley Series in Probability and Statistics) Elisa T. Lee, John Wenyu Wang

Praise for the *Third Edition*

“. . . an easy-to read introduction to survival analysis which covers the major concepts and techniques of the subject.” —*Statistics in Medical Research*

Updated and expanded to reflect the latest developments, *Statistical Methods for Survival Data Analysis, Fourth Edition* continues to deliver a comprehensive introduction to the most commonly-used methods for analyzing survival data. Authored by a uniquely well-qualified author team, the Fourth Edition is a critically acclaimed guide to statistical methods with applications in clinical trials, epidemiology, areas of business, and the social sciences. The book features many real-world examples to illustrate applications within these various fields, although special consideration is given to the study of survival data in biomedical sciences.

Emphasizing the latest research and providing the most up-to-date information regarding software applications in the field, *Statistical Methods for Survival Data Analysis, Fourth Edition* also includes:

- Marginal and random effect models for analyzing correlated censored or uncensored data
- Multiple types of two-sample and K-sample comparison analysis
- Updated treatment of parametric methods for regression model fitting with a new focus on accelerated failure time models
- Expanded coverage of the Cox proportional hazards model
- Exercises at the end of each chapter to deepen knowledge of the presented material

Statistical Methods for Survival Data Analysis is an ideal text for upper-undergraduate and graduate-level courses on survival data analysis. The book is also an excellent resource for biomedical investigators, statisticians, and epidemiologists, as well as researchers in every field in which the analysis of survival data plays a role.

From reader reviews:

Curtis Russell:

Reading a reserve tends to be new life style on this era globalization. With reading you can get a lot of information that will give you benefit in your life. Having book everyone in this world can share their idea. Ebooks can also inspire a lot of people. A great deal of author can inspire their reader with their story as well as their experience. Not only the storyplot that share in the ebooks. But also they write about the knowledge about something that you need example of this. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors these days always try to improve their proficiency in writing, they also doing some exploration before they write for their book. One of them is this Statistical Methods for Survival Data Analysis (Wiley Series in Probability and Statistics).

Jennifer Larson:

Do you have something that that suits you such as book? The book lovers usually prefer to opt for book like comic, short story and the biggest you are novel. Now, why not attempting Statistical Methods for Survival Data Analysis (Wiley Series in Probability and Statistics) that give your fun preference will be satisfied simply by reading this book. Reading behavior all over the world can be said as the means for people to know world a great deal better then how they react in the direction of the world. It can't be stated constantly that reading habit only for the geeky particular person but for all of you who wants to be success person. So , for every you who want to start reading through as your good habit, you may pick Statistical Methods for Survival Data Analysis (Wiley Series in Probability and Statistics) become your own starter.

Viola Boucher:

Is it anyone who having spare time after that spend it whole day by watching television programs or just resting on the bed? Do you need something new? This Statistical Methods for Survival Data Analysis (Wiley Series in Probability and Statistics) can be the reply, oh how comes? The new book you know. You are therefore out of date, spending your time by reading in this brand new era is common not a nerd activity. So what these publications have than the others?

Beatrice Raybon:

What is your hobby? Have you heard that will question when you got learners? We believe that that concern was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person such as reading or as looking at become their hobby. You must know that reading is very important along with book as to be the factor. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You see good news or update regarding something by book. A substantial number of sorts of books that can you take to be your object. One of them is actually Statistical Methods for Survival Data Analysis (Wiley Series in Probability and Statistics).
