BIOINFORMATICS: METHODS AND APPLICATIONS: (Genomics, Proteomics and Drug Discovery) S. C. RASTOGI, NAMITA MENDIRATTA, PARAG RASTOGI

Designed as a text for students and professionals pursuing careers in the fields of molecular biology, pharmacy and bioinformatics, the fourth edition continues to offer a fascinating and authoritative treatment of the entire spectrum of bioinformatics, covering a wide range of high-throughput technologies. In this edition, four new chapters are included and two chapters are updated.

As a student-friendly text, it embodies several pedagogic features such as detailed examples, chapter-end problems, numerous tables, a large number of diagrams, flow charts, a comprehensive glossary and an up-to-date bibliography. This book should prove an invaluable asset to students and researchers in the fields of bioinformatics, biotechnology, computer-aided drug design, information technology, medical diagnostics, molecular biology and pharmaceutical industry.

NEW TO THE FOURTH EDITION: • Includes four new chapters—Introduction to Biological Databases, Introduction to Phylogenetic, Methods of Phylogenetic analysis and RNA Predict. • Updates chapters on Information Search and Data Retrieval and Alignment of Multiple Sequences. • Incorporates Problem Sets containing more than 250 problems and Multiple Choice Questions so that students can test their knowledge and understanding.

Key Features

- State-of-the-art technologies for gene identification, molecular modeling and monitoring of cellular processes
- Data mining, analysis, classification, interpretation and efficient structure determination of genomes and proteomes
- Importance of cell cycle for discovering new drug targets and their ligands
- Computer-aided drug design and ADME-Tox property prediction

Companion website www.phindia.com/rastogi provides useful resources for the teachers as well as for the students.

From reader reviews:

Maureen Jones:

The book BIOINFORMATICS: METHODS AND APPLICATIONS: (Genomics, Proteomics and Drug Discovery) can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the great thing like a book BIOINFORMATICS: METHODS AND APPLICATIONS: (Genomics, Proteomics and Drug Discovery)? A few of you have a different opinion about publication. But one aim which book can give many facts for us. It is absolutely suitable. Right now, try to closer using your book. Knowledge or information that you take for that, you may give for each other; you can share all of these. Book BIOINFORMATICS: METHODS AND APPLICATIONS: (Genomics, Proteomics and Drug Discovery) has simple shape but the truth is know: it has great and large function for you. You can seem the enormous world by open and read a book. So it is very wonderful.

Chad West:

The book untitled BIOINFORMATICS: METHODS AND APPLICATIONS: (Genomics, Proteomics and Drug Discovery) contain a lot of information on the item. The writer explains her idea with easy technique. The language is very simple to implement all the people, so do not really worry, you can easy to read it. The book was compiled by famous author. The author will take you in the new time of literary works. You can read this book because you can read on your smart phone, or product, so you can read the book with anywhere and anytime. If you want to buy the e-book, you can open their official web-site and also order it. Have a nice study.

Carol Wells:

Beside this particular BIOINFORMATICS: METHODS AND APPLICATIONS: (Genomics, Proteomics and Drug Discovery) in your phone, it might give you a way to get closer to the new knowledge or information. The information and the knowledge you are going to got here is fresh in the oven so don't always be worry if you feel like an older people live in narrow village. It is good thing to have BIOINFORMATICS: METHODS AND APPLICATIONS: (Genomics, Proteomics and Drug Discovery) because this book offers to you readable information. Do you occasionally have book but you would not get what it's facts concerning. Oh come on, that will not end up to happen if you have this in the hand. The Enjoyable option here cannot be questionable, like treasuring beautiful island. Use you still want to miss the item? Find this book in addition to read it from currently!

Mary Kerr:

As a college student exactly feel bored to be able to reading. If their teacher questioned them to go to the library as well as to make summary for some reserve, they are complained. Just small students that has reading's spirit or real their pastime. They just do what the educator want, like asked to go to the library.

They go to there but nothing reading seriously. Any students feel that reading is not important, boring and can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this BIOINFORMATICS: METHODS AND APPLICATIONS: (Genomics, Proteomics and Drug Discovery) can make you truly feel more interested to read.
