Observation and Experiment in the Natural and Social Sciences (Boston Studies in the Philosophy and History of Science)

Observation and Experiment in the Natural and Social Sciences (Boston Studies in the Philosophy and History of Science)

This volume is a contribution to the ongoing debate on the distinction between a 'context of justification' and a 'context of discovery'. It is meant for researchers and advanced students in philosophy of science, and for natural and social scientists interested in foundational topics. Spanning a wide range of disciplines, it combines the viewpoint of philosophers and scientists and casts a new interdisciplinary perspective on the problem of observation and experimentation.
