Analysis and Geometry in Several Complex Variables: Proceedings of the 40th Taniguchi Symposium (Trends in Mathematics) Gen Komatsu, Masatake Kuranishi

This volume consists of a collection of articles for the proceedings of the 40th Taniguchi Symposium Analysis and Geometry in Several Complex Variables held in Katata, Japan, on June 23-28, 1997. Since the inhomogeneous Cauchy-Riemann equation was introduced in the study of Complex Analysis of Several Variables, there has been strong interaction between Complex Analysis and Real Analysis, in particular, the theory of Partial Differential Equations. Problems in Complex Analysis stimulate the development of the PDE theory which subsequently can be applied to Complex Analysis. This interaction involves Differential Geometry, for instance, via the CR structure modeled on the induced structure on the boundary of a complex manifold. Such structures are naturally related to the PDE theory. Differential Geometric formalisms are efficiently used in settling problems in Complex Analysis and the results enrich the theory of Differential Geometry. This volume focuses on the most recent developments in this interaction, including links with other fields such as Algebraic Geometry and Theoretical Physics. Written by participants in the Symposium, this volume treats various aspects of CR geometry and the Bergman kernel/ projection, together with other major subjects in modern Complex Analysis. We hope that this volume will serve as a resource for all who are interested in the new trends in this area. We would like to express our gratitude to the Taniguchi Foundation for generous financial support and hospitality. We would also like to thank Professor Kiyosi Ito who coordinated the organization of the symposium.

From reader reviews:

Jose York:

Have you spare time for any day? What do you do when you have more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent all their spare time to take a wander, shopping, or went to the particular Mall. How about open as well as read a book titled Analysis and Geometry in Several Complex Variables: Proceedings of the 40th Taniguchi Symposium (Trends in Mathematics)? Maybe it is being best activity for you. You understand beside you can spend your time together with your favorite's book, you can better than before. Do you agree with it has the opinion or you have additional opinion?

Jesus Thresher:

Book is definitely written, printed, or outlined for everything. You can learn everything you want by a e-book. Book has a different type. As you may know that book is important factor to bring us around the world. Close to that you can your reading talent was fluently. A book Analysis and Geometry in Several Complex Variables: Proceedings of the 40th Taniguchi Symposium (Trends in Mathematics) will make you to be smarter. You can feel far more confidence if you can know about everything. But some of you think this open or reading a book make you bored. It's not make you fun. Why they are often thought like that? Have you seeking best book or acceptable book with you?

John Street:

What do you about book? It is not important along with you? Or just adding material if you want something to explain what the ones you have problem? How about your extra time? Or are you busy individual? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have time? What did you do? All people has many questions above. The doctor has to answer that question mainly because just their can do that. It said that about e-book. Book is familiar in each person. Yes, it is right. Because start from on guardería until university need this specific Analysis and Geometry in Several Complex Variables: Proceedings of the 40th Taniguchi Symposium (Trends in Mathematics) to read.

Jackie Frost:

Spent a free time for you to be fun activity to do! A lot of people spent their free time with their family, or all their friends. Usually they doing activity like watching television, gonna beach, or picnic inside the park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? Could possibly be reading a book could be option to fill your cost-free time/ holiday. The first thing that you'll ask may be what kinds of e-book that you should read. If you want to attempt look for book, may be the reserve untitled Analysis and Geometry in Several Complex Variables: Proceedings of the 40th Taniguchi Symposium (Trends in Mathematics) can be excellent book to read. May be it might be best activity to you.
