Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) William F. Gilreath, Phillip A. Laplante

This book examines computer architecture, computability theory, and the history of computers from the perspective of minimalist computing - a framework in which the instruction set consists of a single instruction. This approach is different than that taken in any other computer architecture text, and it is a bold step. The audience for this book is researchers, computer hardware engineers, software engineers, and systems engineers who are looking for a fresh, unique perspective on computer architecture. Upper division undergraduate students and early graduate students studying computer architecture, computer organization, or embedded systems will also find this book useful. A typical course title might be "Special Topics in Computer Architecture." The organization of the book is as follows. First, the reasons for studying such an "esoteric" subject are given. Then, the history and evolution of instruction sets is studied with an emphasis on how modern computing has features of one instruction computing. Also, previous computer systems are reviewed to show how their features relate to one instruction computers. Next, the primary forms of one instruction set computing are examined. The theories of computation and of Turing machines are also reviewed to examine the theoretical nature of one instruction computers. Other processor architectures and instruction sets are then mapped into single instructions to illustrate the features of both types of one instruction computers. In doing so, the features of the processor being mapped are highlighted.

From reader reviews:

Nathan Marker:

Do you among people who can't read enjoyable if the sentence chained from the straightway, hold on guys that aren't like that. This Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) book is readable by you who hate those perfect word style. You will find the information here are arrange for enjoyable looking at experience without leaving possibly decrease the knowledge that want to deliver to you. The writer associated with Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) content conveys thinking easily to understand by many people. The printed and e-book are not different in the content material but it just different such as it. So , do you nevertheless thinking Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) is not loveable to be your top listing reading book?

Robert Schrader:

Do you have something that you prefer such as book? The publication lovers usually prefer to opt for book like comic, small story and the biggest some may be novel. Now, why not attempting Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) that give your enjoyment preference will be satisfied by means of reading this book. Reading addiction all over the world can be said as the way for people to know world considerably better then how they react towards the world. It can't be said constantly that reading routine only for the geeky individual but for all of you who wants to end up being success person. So , for all you who want to start looking at as your good habit, you could pick Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) become your own starter.

John Harrison:

This Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) is completely new way for you who has interest to look for some information given it relief your hunger details. Getting deeper you upon it getting knowledge more you know or else you who still having little bit of digest in reading this Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) can be the light food in your case because the information inside that book is easy to get by means of anyone. These books acquire itself in the form which is reachable by anyone, sure I mean in the e-book contact form. People who think that in e-book form make them feel sleepy even dizzy this publication is the answer. So there is not any in reading a reserve especially this one. You can find actually looking for. It should be here for you. So , don't miss the idea! Just read this e-book type for your better life in addition to knowledge.

Jack Morgan:

As a pupil exactly feel bored in order to reading. If their teacher requested them to go to the library in order to make summary for some guide, they are complained. Just tiny students that has reading's spirit or real their hobby. They just do what the professor want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that examining is not important, boring as well as can't see colorful images on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this Computer Architecture: A Minimalist Perspective (The Springer International Series in Engineering and Computer Science) can make you experience more interested to read.
