Culture, biologie et cognition - Le labyrinthe humain: Essai de philosophie (French Edition) Fabrice Garcia

La création, l'émergence et la nouveauté sont des notions indispensables pour comprendre l'évolution naturelle et l'histoire culturelle. Il est toutefois bien difficile de les définir : comment en effet repenser adéquatement la nouveauté et l'émergence ? Comment même les envisager, avec leurs conséquences et leurs répercussions, dans l'histoire humaine en général si la vie, la conscience et la culture forment des nœuds gordiens impossibles à défaire ? Cet essai espère résoudre de tels problèmes en répertoriant les contradictions et les tensions des projets naturalistes. Une autre image de l'histoire humaine surgit alors, plus surprenante que celle imposée par la phénoménologie de la vie et la psychologie évolutionniste.

Cet ouvrage prépare le suivant qui est son complément indispensable : *Une histoire de l'homme sans fil d'Ariane*.
