Renewable Energy Resources John Twidell, Tony Weir

Renewable Energy Resources is a numerate and quantitative text covering the full range of renewable energy technologies and their implementation worldwide. Energy supplies from renewables (such as from biofuels, solar heat, photovoltaics, wind, hydro, wave, tidal, geothermal, and ocean-thermal) are essential components of every nation's energy strategy, not least because of concerns for the local and global environment, for energy security and for sustainability. Thus in the years between the first and this third edition, most renewable energy technologies have grown from fledgling impact to significant importance because they make good sense, good policy and good business.

This Third Edition is extensively updated in light of these developments, while maintaining the book's emphasis on fundamentals, complemented by analysis of applications. Renewable energy helps secure national resources, mitigates pollution and climate change, and provides cost effective services. These benefits are analysed and illustrated with case studies and worked examples. The book recognises the importance of cost effectiveness and efficiency of end-use. Each chapter begins with fundamental scientific theory, and then considers applications, environmental impact and socio-economic aspects before concluding with Quick Questions for self-revision and Set Problems. The book includes Reviews of basic theory underlying renewable energy technologies, such as electrical power, fluid dynamics, heat transfer and solid-state physics. Common symbols and cross-referencing apply throughout; essential data are tabulated in appendices.

An associated eResource provides supplementary material on particular topics, plus a solutions guide to Set Problems.

Renewable Energy Resources supports multi-disciplinary master degrees in science and engineering, and specialist modules in first degrees. Practising scientists and engineers who have not had a comprehensive training in renewable energy will find it a useful introductory text and a reference book.

From reader reviews:

Anthony Laflamme:

In this period of time globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of recommendations to get information example: internet, newspapers, book, and soon. You can observe that now, a lot of publisher in which print many kinds of book. Often the book that recommended for you is Renewable Energy Resources this guide consist a lot of the information of the condition of this world now. This particular book was represented just how can the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. Typically the writer made some study when he makes this book. Here is why this book acceptable all of you.

George Cardenas:

Many people spending their moment by playing outside along with friends, fun activity using family or just watching TV all day every day. You can have new activity to invest your whole day by reading a book. Ugh, do you think reading a book can really hard because you have to take the book everywhere? It all right you can have the e-book, bringing everywhere you want in your Smart phone. Like Renewable Energy Resources which is keeping the e-book version. So , try out this book? Let's observe.

Richard Fentress:

Don't be worry if you are afraid that this book will filled the space in your house, you will get it in e-book way, more simple and reachable. This particular Renewable Energy Resources can give you a lot of friends because by you taking a look at this one book you have thing that they don't and make an individual more like an interesting person. That book can be one of a step for you to get success. This e-book offer you information that perhaps your friend doesn't learn, by knowing more than additional make you to be great individuals. So , why hesitate? We need to have Renewable Energy Resources.

Tyler Woodley:

As a pupil exactly feel bored in order to reading. If their teacher asked them to go to the library or to make summary for some guide, they are complained. Just very little students that has reading's spirit or real their hobby. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading significantly. Any students feel that reading is not important, boring as well as can't see colorful photographs on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Renewable Energy Resources can make you experience more interested to read.
