Big Data Made Easy: A Working Guide to the Complete Hadoop Toolset

Michael Frampton

Big Data Made Easy: A Working Guide to the Complete Hadoop Toolset Michael Frampton

Many corporations are finding that the size of their data sets are outgrowing the capability of their systems to store and process them. The data is becoming too big to manage and use with traditional tools. The solution: implementing a big data system.

As *Big Data Made Easy: A Working Guide to the Complete Hadoop Toolset* shows, Apache Hadoop offers a scalable, fault-tolerant system for storing and processing data in parallel. It has a very rich toolset that allows for storage (Hadoop), configuration (YARN and ZooKeeper), collection (Nutch and Solr), processing (Storm, Pig, and Map Reduce), scheduling (Oozie), moving (Sqoop and Avro), monitoring (Chukwa, Ambari, and Hue), testing (Big Top), and analysis (Hive).

The problem is that the Internet offers IT pros wading into big data many versions of the truth and some outright falsehoods born of ignorance. What is needed is a book just like this one: a wide-ranging but easily understood set of instructions to explain where to get Hadoop tools, what they can do, how to install them, how to configure them, how to integrate them, and how to use them successfully. And you need an expert who has worked in this area for a decade—someone just like author and big data expert Mike Frampton.

Big Data Made Easy approaches the problem of managing massive data sets from a systems perspective, and it explains the roles for each project (like architect and tester, for example) and shows how the Hadoop toolset can be used at each system stage. It explains, in an easily understood manner and through numerous examples, how to use each tool. The book also explains the sliding scale of tools available depending upon data size and when and how to use them. *Big Data Made Easy* shows developers and architects, as well as testers and project managers, how to:

- Store big data
- Configure big data
- Process big data
- Schedule processes
- Move data among SQL and NoSQL systems
- Monitor data
- Perform big data analytics
- Report on big data processes and projects
- Test big data systems

Big Data Made Easy also explains the best part, which is that this toolset is free. Anyone can download it and—with the help of this book—start to use it within a day. With the skills this book will teach you under your belt, you will add value to your company or client immediately, not to mention your career.

What you'll learn

- How to install and employ Hadoop
- How to install and use Hadoop-related tools like Hive, Storm, Pig, Solr, Oozie, Ambari, and many others
- How to set up and test a big data system
- How to scale the system for the amount of data at hand and the data you expect to accumulate
- How those who have spent their careers in the SQL database world can apply their skills to building big data systems

Who this book is for

This book is for developers, architects, IT project managers, database administrators, and others charged with developing or supporting a big data system. It is also for a general IT audience, anyone interested in Hadoop or big data, and those experiencing problems with data size. It's also for anyone who would like to further their career in this area by adding big data skills.

From reader reviews:

Karole Standley:

What do you consider book? It is just for students since they are still students or it for all people in the world, the particular best subject for that? Simply you can be answered for that concern above. Every person has various personality and hobby for each and every other. Don't to be pushed someone or something that they don't wish do that. You must know how great in addition to important the book Big Data Made Easy: A Working Guide to the Complete Hadoop Toolset. All type of book are you able to see on many options. You can look for the internet solutions or other social media.

Judith Rayl:

Reading a publication tends to be new life style with this era globalization. With looking at you can get a lot of information that can give you benefit in your life. With book everyone in this world can certainly share their idea. Books can also inspire a lot of people. Lots of author can inspire all their reader with their story or their experience. Not only the story that share in the textbooks. But also they write about the data about something that you need instance. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors these days always try to improve their talent in writing, they also doing some analysis before they write to their book. One of them is this Big Data Made Easy: A Working Guide to the Complete Hadoop Toolset.

James Crow:

That publication can make you to feel relax. This kind of book Big Data Made Easy: A Working Guide to the Complete Hadoop Toolset was colourful and of course has pictures on there. As we know that book Big Data Made Easy: A Working Guide to the Complete Hadoop Toolset has many kinds or type. Start from kids until adolescents. For example Naruto or Investigator Conan you can read and think you are the character on there. Therefore not at all of book are usually make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for you personally and try to like reading that will.

Edward Apodaca:

A number of people said that they feel fed up when they reading a reserve. They are directly felt the item when they get a half parts of the book. You can choose the actual book Big Data Made Easy: A Working Guide to the Complete Hadoop Toolset to make your own personal reading is interesting. Your current skill of reading talent is developing when you such as reading. Try to choose straightforward book to make you enjoy you just read it and mingle the opinion about book and reading through especially. It is to be very first opinion for you to like to available a book and read it. Beside that the book Big Data Made Easy: A Working Guide to the Complete Hadoop Toolset can to be your brand new friend when you're feel alone and confuse using what must you're doing of the time.
