The Future of Religion and the Religion of the Future Theodore John Rivers

In *The Future of Religion and the Religion of the Future*, Theodore John Rivers explores the changing relationship between technology and religion. Rivers draws upon his expertise in the fields of medieval and religious history to discuss how the promotion of Christianity and monasticism in the Middle Ages began a process that has lent religious undertones to the way in which we interact with modern technology. Rivers ultimately suggests that the growing presence of technology makes it a likely candidate for the next religious form, competing with all the major religions in place today.
