## Recombinant DNA Methodology (Selected Methods in Enzymology)

Recombinant DNA methods are powerful, revolutionary techniques that allow the isolation of single genes in large amounts from a pool of thousands or millions of genes and the modification of these isolated genes or their regulatory regions for reintroduction into cells for expression at the RNA or protein levels. These attributes lead to the solution of complex biological problems and the production of new and better products in the areas of medicine, agriculture, and industry.

**Recombinant DNA Methodology**, a volume in the **Selected Methods in Enzymology** series produced in benchtop format, contains a selection of *key* articles from Volumes 68, 100, 101, 153, 154, and 155 of **Methods in Enzymology**. The essential and widely used procedures provided at an affordable price will be an invaluable aid to the graduate student and the researcher.

### Key Features

- \* Enzymes in DNA research
- \* DNA isolation, hybridization, and cloning
- \* DNA sequence analysis
- \* cDNA cloning
- \* Gene products
- \* Identification of cloned genes and mapping of genes
- \* Monitoring cloned gene expression
- \* Cloning and transferring of genes into yeast cells
- \* Cloning and transferring of genes into plant cells
- \* Cloning and transferring of genes into animal cells
- \* Site-directed mutagenesis
- \* Protein engineering
- \* Expression vectors

### **From reader reviews:**

#### **Carmen Fields:**

Within other case, little persons like to read book Recombinant DNA Methodology (Selected Methods in Enzymology). You can choose the best book if you like reading a book. As long as we know about how is important a book Recombinant DNA Methodology (Selected Methods in Enzymology). You can add know-how and of course you can around the world by way of a book. Absolutely right, since from book you can know everything! From your country until eventually foreign or abroad you will be known. About simple matter until wonderful thing it is possible to know that. In this era, we could open a book as well as searching by internet gadget. It is called e-book. You can utilize it when you feel uninterested to go to the library. Let's examine.

#### **Sharonda Adair:**

This Recombinant DNA Methodology (Selected Methods in Enzymology) book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is information inside this e-book incredible fresh, you will get details which is getting deeper you read a lot of information you will get. This Recombinant DNA Methodology (Selected Methods in Enzymology) without we realize teach the one who studying it become critical in imagining and analyzing. Don't be worry Recombinant DNA Methodology (Selected Methods in Enzymology) can bring any time you are and not make your bag space or bookshelves' turn into full because you can have it within your lovely laptop even mobile phone. This Recombinant DNA Methodology (Selected Methods in Enzymology) having fine arrangement in word and layout, so you will not really feel uninterested in reading.

#### **Taylor Becker:**

Nowadays reading books are more than want or need but also become a life style. This reading routine give you lot of advantages. The benefits you got of course the knowledge the particular information inside the book that improve your knowledge and information. The information you get based on what kind of book you read, if you want attract knowledge just go with training books but if you want experience happy read one together with theme for entertaining for instance comic or novel. Often the Recombinant DNA Methodology (Selected Methods in Enzymology) is kind of reserve which is giving the reader erratic experience.

#### **Joshua Little:**

Spent a free time and energy to be fun activity to do! A lot of people spent their free time with their family, or their particular friends. Usually they accomplishing activity like watching television, going to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your own free time/ holiday? Could possibly be reading a book is usually option to fill your totally free time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to try look for book, may be the guide untitled Recombinant DNA Methodology

(Selected Methods in Enzymology) can be fine book to read. May be it can be best activity to you.
